Senior Software Engineer with 10+ years of Java backend experience across SaaS, healthcare, and e-commerce. Focused on REST API design, Spring Boot microservices, and building backend services that hold up reliably in production. Comfortable picking up new domains quickly — worked across clinical, enterprise automation, and consumer-facing systems. Hands-on with Docker, Kubernetes, PostgreSQL, and Jenkins CI/CD. English fluent; based in Vienna, no relocation needed.

Senior Software Engineer (R&D Engineer Software 3)

Jul 2022–Present

Automatic Automation — Enterprise Workload Automation Platform (SaaS)

- Took a context-based report search feature from hackathon prototype to production release — the REST endpoint reduced report analysis time by 50% and was shipped as part of a standard product release.
- Led a Java API test migration across the Automation Engine: replaced legacy tests with clean, JUnit-based API tests; improved maintainability and reliability across a large codebase.
- Built and delivered REST APIs consumed by enterprise customers globally; ran cross-team PR reviews and maintained Jenkins/Bazel CI/CD pipelines.
- Built an internal support prototype using Google Gemini and Claude Code (Anthropic) to assist on-call engineers — practical experience integrating LLMs into a backend service context.
- **Tech:** Java 17, OSGi, REST | Docker, Kubernetes | JUnit, Robot Framework | Jenkins, Bazel | PostgreSQL, Oracle, DB2
