Vienna, Austria | [linkedin.com/in/meenakshi-subudhi](https://www.linkedin.com/in/meenakshi-subudhi)

Austrian RWR-Plus Visa | Full Work Permit

PROFESSIONAL SUMMARY

Senior Software Engineer with 10+ years of experience designing and delivering Java-based backend systems and REST APIs across enterprise workload automation, healthcare imaging, and e-commerce domains. Proven track record of leading technical migrations, driving test quality, and independently shipping production-integrated features. Currently contributing to Broadcom's Automic Automation Engine — a global SaaS workload automation platform. Experienced in Agile (SAFe, Scrum, Kanban) environments; adept at cross-functional collaboration across distributed teams.

PROFESSIONAL EXPERIENCE

Senior Software Engineer (R&D Engineer Software 3) | Broadcom Inc. | Vienna, Austria Jul 2022 – Present

Product: Automic Automation — Enterprise Workload Automation Platform (SaaS)

- Independently designed and built a working AI-powered on-call support assistant prototype by configuring a custom Google Gem, ingesting operational documents via NotebookLM, and optimising system prompts for contextual query resolution.
- Designed and implemented a context-based report search REST endpoint that improved report analysis efficiency by 50%; feature was independently developed as a hackathon project and subsequently integrated into the production product.
- Took technical lead on the Java API test migration — driving systematic replacement of legacy tests with structured Java API tests across the Automation Engine.
- Designed and implemented multiple REST API features on the Automation Engine core.
- Delivered multiple feature implementations consumed by the SaaS enablement team, including a REST endpoint for storage file downloads via AWI.
- Conducted regular PR reviews across own team and adjacent teams, providing technical feedback and maintaining code quality standards.
- Provided on-call customer support — troubleshooting and resolving production issues directly with customers.
- Implemented features, enhancements, bug fixes, and security vulnerability patches on the Automation Engine core.
- Authored and maintained end-to-end, regression, and Robot Framework automated tests; monitored nightly CI/CD test runs and triaged failures.
- Collaborated within an 8-person cross-functional team operating under the SAFe (Scaled Agile Framework), participating in PI Planning, sprint ceremonies, and cross-team coordination.

Tech: Java 17, OSGi, REST, Automic Scripting Language | Docker, Kubernetes | Robot Framework, qTest | Jenkins, Bazel, JFrog, GitHub | PostgreSQL, Oracle, MS SQL, DB2 | Sonar, Grafana, Black Duck | Google Gemini | Rally, Jira

Software Developer | Dodax EU GmbH | Vienna, Austria

Sep 2021 – Jul 2022

Domain: E-commerce platform serving millions of items and customers

- Optimised web page loading performance for a catalogue spanning several million products; delivered measurable improvement in page response times.

- Maintained and enhanced services and batch jobs across vendor management, logistics, order processing, and third-party API integrations.
- Increased test coverage to 80% for the service tool application.
- Participated in full software lifecycle: design, OOP development, unit testing, integration testing, release, and production maintenance.

Tech: Java 8/11, Spring Boot, Hibernate/JPA, JSF, REST, MySQL, PostgreSQL, Maven, Jenkins, AWS (SQS)

Software Developer | Medical University of Vienna | Vienna, Austria Aug 2018 – Aug 2021

Product: Octavo — Image-based Medical Diagnosis Software

- Improved scan loading performance by 300%, directly enhancing clinical usability of the imaging tool.
- Adapted the product to support new scan types and built new features aligned with established design patterns.
- Resolved 200+ bugs through systematic root cause analysis and refactoring.
- Increased code coverage from 0% to 50%+ within one year, establishing a reliable test baseline.
- Onboarded and mentored a junior developer over one month — covering codebase walkthrough, tooling, project workflow, and knowledge transfer to enable independent contribution.
- Contributed to full lifecycle: development, unit testing, deployment, and documentation using Jira, Confluence, Bitbucket, GitLab, and SonarLint.

Tech: Java, Eclipse RCP, SWT, Swing, OpenGL, SOAP, JUnit 4, Mockito, GitLab

Software Engineer | Tata Consultancy Services | Bangalore, India Sep 2013 – Aug 2016

Clients: GE Healthcare (PLM) | Internal enterprise search platform

- Built and customised an EXALEAD CloudView enterprise search application, consolidating data from multiple databases and ERP systems to enable product analytics and business insights.
- Developed frontend and backend features for an Enovia-based PLM application for GE Healthcare using Java EE, JavaScript, and HTML.
- Delivered bug fixes and enhancements across both projects; received TCS Gems award and client appreciation for successful project delivery.

Tech: Java EE, JavaScript, HTML, EXALEAD CloudView, Enovia

EDUCATION

B.Tech in Mechanical Engineering

2009 – 2013

College of Engineering and Technology, Bhubaneswar, India | CGPA: 8.6/10 | Department Fellowship — Top 5 Scorer

TECHNICAL SKILLS

Languages & Core: Java 8, 11, 17 | Java EE | JavaScript | HTML | CSS | SQL

Frameworks: OSGi, Spring Boot, Hibernate/JPA, JSF, Eclipse RCP (SWT, Swing, OpenGL)

APIs & Integration: REST, SOAP, Swagger, JSON, Postman

Databases: PostgreSQL, MySQL, Oracle, MS SQL, DB2, H2, Liquibase

Testing: JUnit 4/5, Mockito, Robot Framework, End-to-End, Regression

DevOps & Cloud: Docker, Kubernetes, Jenkins, Maven, Tomcat, AWS (SQS)

Observability: Elasticsearch, Kibana, Grafana

Version Control: Git, GitHub, GitLab, Bitbucket

Project Tools: Jira, Confluence, Rally, Atlassian Suite, SonarLint, Black Duck, qTest, Bazel, JFrog

AI Tools: Google Gemini, NotebookLM, Generative Code Assistant (Google), Cursor, Claude (Anthropic), Anthropic Cowork

OS / IDEs: Linux, Windows | IntelliJ IDEA, Eclipse, VS Code, Cursor

CERTIFICATIONS & TRAINING

-
- Generative AI: Prompt Engineering Basics — IBM via Coursera (2025)
 - Internal AI and technical training programmes — Broadcom Inc.

LANGUAGES

English: Fluent (professional working proficiency)

German: A2

Odia: Native

AWARDS & RECOGNITION

- Broadcom: Hackathon project (context-based report search) integrated into Automic Automation production release.
- Medical University of Vienna: Recognised for 300% improvement in scan loading performance.
- TCS: TCS Gems Award and client commendation for successful PLM project delivery (GE Healthcare).
- Academic: Department Fellowship for Top 5 scorer — B.Tech (2009–2013).
